Group II lacks a corresponding technical feature of providing method for transporting is provided with clamping means connected to the transport beam for clamping in at least one lateral edge extending in the X-direction of the printed circuit board to be transported.

Because these inventions are distinct for the reasons given above, restriction for examination purpose as indicated is proper.

2. A telephone call was made to Richard C. Peet on 5/01/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
